**Subject:** Fw: About Pescadero Lagoon/Creek and MLPA Stakeholders Groups

Dear MLPA Stakeholders Groups:

It has come to attention that one of the current 4 possible plans for the State Marine Reserve/Central Coast still includes listing Pescadero Lagoon/Creek as a State marine Reserve, a protected area where fishing for steelhead would not be allowed at all.

This email is to again strenuously object to this over-regulation of an already protected and carefully used-and enjoyed-slice of nature. Minimal "invasion" of this water/land is currently what happens with steelhead fisher people.....and it should be able to happen in the future.

Please do not take away this unique recreational aspect of this valued area !  
Thank you in advance for your attention to this plea!

Best Regards-Judy Decker-Inouye
